CASE STUDY

ISHFAQ GHANI

Basic information:

Name : Ishfaq Ghani	Project name: 15 Days Web Development Training	Gender : Male	Age : 24 years
Education : Bachelors in Computer Science	Occupation : Web Developer, Freelancer, Lecturer	Contact: 03332272830	Address : Babri Banda, Tehsil and District Kohat

Introduction:

My name is **Ishfaq Ghani**. I am a Bachelor's graduate in Computer Science with expertise in Web Development and Digital Marketing. With experience in web development, teaching, and freelancing, I have honed my skills in various programming languages and web technologies. My proficiency in WordPress, React.js, Laravel, and database management has allowed me to work on multiple projects successfully. My passion lies in leveraging my technical skills to build innovative web solutions and establish a strong freelancing career.

Previous situation:

Before joining the training program, I had a basic understanding of web development. I had worked on a few personal projects, but I wanted to refine my skills and gain more practical knowledge. To achieve this, I enrolled in a structured training program that focused on web technologies, enabling me to enhance my expertise in development and freelancing.

Training program:

In January 2024, I participated in a **15-DAY TRAINING** program on **WEB DEVELOPMENT**, conducted by **KPITB** in collaboration with **ECI** at **KUST University**. The training covered:

- Front-end Development (HTML, CSS, JavaScript, Bootstrap, React.js)
- Back-end Development (PHP, Laravel, Node.js)
- Database Management (SQL, MongoDB)
- WordPress Development
- Website Deployment & Hosting
- Freelancing Techniques & Client Acquisition

Training Experience:

During this 15-day training, I gained hands-on experience in various web development tools and technologies, allowing me to refine my skills further. As a result of this training, I successfully built several small web projects and started working on freelance projects on platforms like Fiverr and Upwork. I also learned WordPress development, which enabled me to secure multiple website design projects.

I appreciate the efforts of **KPITB, ECI, KUST University**, and the trainers who conducted this impactful training program.

Current Situation:

Currently, I am working as a **Web Developer** while also managing my freelance projects. I continue to teach as a Visiting Lecturer, guiding students in Web Development and WordPress. My newly acquired skills have significantly contributed to improving my efficiency and problem-solving capabilities, enabling me to deliver high-quality projects and generate a stable income through freelancing.

Conclusion & suggestions:

Web Development is an essential skill in today's digital era. I strongly encourage students and professionals to participate in such training programs to stay competitive in the job market. Learning multiple skills ensures financial stability and opens doors to diverse career opportunities.

As a suggestion, I recommend extending the training duration beyond 15 days to allow participants to grasp complex concepts better. Moreover, adding more hands-on projects and industry collaborations would enhance the effectiveness of the program.

Lastly, I am grateful to **KPITB, ECI, KUST University**, and the entire team for their dedication to empowering youth and fostering skill development.

Thank You
